Ideal for NON-AUTOMATED HATCHERIES

SEMI-AUTOMATIC, no operator impact during operation

DATA COLLECTION in real time

CEVA.COM

Premium  
**SPRAY & GEL**  
vaccination

**Hatchery equipment**

**High Spray Quality Without Automation**

Flat nozzle system ensuring high level of spray **homogeneity**.

**Consistent coverage** from start to finish of the crate.

**Automatic Gel Arm System**

Gel droplet technology is the **most efficient** route of administration for Immucox range.

A **motorized arm**, combined with an **electronic dispensing syringe**, ensures a homogenous & high-quality gel droplet distribution.

**Non Operator Dependent Vaccination**

All critical parameters are monitored, **alerting the operator** if any part of the vaccination process deviates from the correct sequence.

The Smart Hatch Spray & Gel **user friendly design** allow any operator to start it within seconds.

**Technical Description**

<b>Applications :</b>	Day old chicks	<b>DB :</b>	<80Db
<b>Vaccination Route :</b>	Spray an Gel vaccination	<b>Overall Dimensions :</b>	1450x800x1500 mm
<b>Volume :</b>	Spray 10ml to 20ml Gel 15 to 27 ml	<b>Weight :</b>	100 kg
<b>Voltage supply :</b>	100 - 240 VAC	<b>Speed :</b>	Up to 450 crates/hour
		<b>Type of environment :</b>	Indoor use only in wet location

As part of the Ceva Hatchery Immunisation Control Keys program (C.H.I.C.K), our Ceva Hatchery Specialist will monitor the good operation of the equipment and the quality of vaccination during the routine visit.
